UNIQUE ID CREATION CARD

Lithotronic Field Cards v1.0 • Keep IDs short, unique, and stable across all sheets.

Core pattern

Use TYPE-MODULE-NNN for subjects and RUN-MOD-#### for runs. Keep capitals, hyphens, and zero-padded numbers consistent.

Subject ID	SOAP-SF-001
Run ID	RUN-SOAP-0001
Set ID	SET-001
Sweep ID	SWP-001
Package ID	PKG-SOAP-001

Rules

- One thing = one subject_id
- One trial = one run_id everywhere
- Never reuse an old ID for a new trial
- Use the same spelling on every sheet
- Increment numbers in sequence only

New IDs / Notes

RUN ENTRY CARD

Use this card in the field before data is transferred into the workbook.

Minimum run record

run_id	_____
subject_id	_____
module_family	_____
date	YYYY-MM-DD
start - end	____ to ____
location / zone	_____

Capture these

- Inputs and quantities
- Process steps in order
- Environment: temp, humidity, wind, shade
- Observed output: yield, form, notes
- Photo or file reference if used

Field Notes / Sequence Summary

RESIDUAL CHECK CARD

Residual = observed value minus expected value. Log the difference, then decide what changes next.

Quick workflow

- State the target clearly before the run
- Measure the actual result
- Write expected and observed values
- Compute residual and compare to tolerance
- Tag the loss / gain channel if known
- Record the next correction immediately

Expected	_____
Observed	_____
Residual	_____
Tolerance	_____
Pass / Fail	_____

Residual Notes / Drift / Anomaly

VALIDATION CHECKLIST CARD

Use before governance, promotion, or transferring a run into STANDARD_RECIPES / DEPLOYMENT.

Completion checklist

- Subject exists in SUBJECTS
- Run exists in RESEARCH_RUNS
- All materials entered in INPUTS
- All process steps entered in PROCESS_LOG
- Expected and observed outputs entered
- At least one residual entered
- Corrections captured for next run
- Validation row completed
- Preflight checked

Decision states

Promote	Validated and reusable
Hold	Needs review / more data
Retry	Same path, corrected
Resweep	New branch required

Approval / Blocker Notes
